Portrait

Globetrotter, student, communication designer, entrepreneur and today what is colloquially called »dog trainer«. However, my profession would be more accurately described as »dog mentor«, because educational and behavioral advice is the focus of my work. My passion also includes dog care.

Away from right or wrong there is a deep understanding of dog behavior, that's where I'm at home.

Walking

The basis for the needs-based activity, encouragement and utilization of each individual dog is a group of max. 4 dogs, which is carefully put together.

In addition to safety, adherence to group rules helps to ensure that we work together in a respectful and cooperative manner. Behavior such as recall, walking on a loose leash and waiting in each walk is therefore practiced proactively. This creates space for individual self-actualization and a balanced relationship.

Bookings can be made as and when required within the specified walk times. Regular participants are preferred.
